## COLLEZIONE BAGNI 2012

Andrea Bassanello

La collezione bagni 2012 di Modulnova si caratterizza per la ricerca sui materiali che rivestono sanitari e arredi. Ne sono esempio i mobili in lastre d'acciaio da 5 mm, accostati a lavabi di pietra naturale e a contenitori laccati con lavorazione *foldig*.

• The 2012 bathroom collection by Modulnova is characterised by the attention given to the materials used in the sanitary fittings and furniture. Units in 5 mm sheet steel for example are combined with sinks in natural stone and lacquered containers with a folding detail.
